

LeddarTech have announced the completion of a combined investment of USD \$101m led by Osram and including Delphi, Magneti Marelli, and Integrated Device Technology as strategic investors, as well as Fonds de solidarité FTQ. This round of funding, LeddarTech's largest to date, will allow them to enhance their development efforts, expand their R&D team, and accelerate ongoing lidar development programs with their tier-1 automotive customers for rapid market deployment.

LeddarTech are the developer and owner of Leddar, a patented solid-state lidar sensing technology. Developed over 10+ years of R&D, Leddar is a unique combination of advanced light wave digital signal processing and software algorithms that enable the production of solid-state lidars delivering superior performance and reliability with low price.
