

VW to Recall 700K Cars for Interior Lighting Issue

Monday, 27 August 2018

Volkswagen will have to recall about 700,000 Tiguan SUVs and Touran MPVs worldwide due to a possible lighting defect.

It's been found that humidity can cause a short circuit at the panoramic roof's light strip, which can cause scorching damage on the roof and possibly set the vehicle on fire. VW are working on a solution.
